Each day communities are facing drug and alcohol related problems at an alarming rate. Whether it is youth or adults, drugs are being ingested, snorted, huffed, concealed, sold and smoked every day. Also, new alcoholic beverages, mixers and concealment methods are coming onto the market everyday. Most drug abusers frequently show signs and /or symptoms through their eyes, demeanor, clothing, and slang terms. Due to the lack of knowledge of the different alcoholic drinks more youth are finding ways to access the different alcoholic beverages and in some cases consume them right in front of you. One question you need to ask yourself? Can you identify over the counter items, prescription drugs, inhalants, OTC medicines, synthetic drugs, clothing, energy drinks, whipped cream, milk, dilated pupils and other physical indicators? Well, this is only the beginning. This two day class will provide over 100 visual aids and give you more information than you can believe. ***Class is limited to the first 70 registrations.***
